

Carbon Monoxide Alarm with Digital Display, AA Battery

OVERVIEW

The Quell Carbon Monoxide (CO) alarm is designed to detect the early presence of carbon monoxide, a harmful gas that can be emitted from sources such as heating and cooking systems, vehicle engines, fuels, and blocked chimneys. This alarm is suitable for residential properties and offers a slim, user-friendly design that makes it perfect for use in any living area. It can be easily installed on the wall, allowing the digital display to be clearly visible, or used freestanding on a table or shelf for added convenience.

Powered by AA batteries, the alarm continuously monitoring of CO levels in your home. When elevated levels of carbon monoxide are detected, the alarm emits a loud warning signal, alerting you to potential danger.

It's important to emphasise that CO alarms are meant to complement, not replace, traditional smoke alarms. A CO alarm is not a smoke alarm and does not fulfill the legal requirements for smoke alarm installation in a home.

WHAT'S IN THE PACK?

- Carbon Monoxide Alarm
- Mounting bracket
- Screws and plugs fixings
- 2 x AA batteries
- Manual
