

Fire Blanket

Overview

A fire blanket is a fast and efficient way to smother cooking fires, protect individuals from burns and help prevent fires from escalating .

Fire blankets work by depriving the fire of oxygen supply. You should never remove the fire blankets from a fire until emergency services have been called and the fire's fuel source has cooled.

Quell's fire blankets are durable, easy to use and comply with Australian Standard AS/NZS 3504.

Fire blankets may only be used once and should be disposed of after use or if they have become damaged.

Quell fire blankets are available in two sizes. The 1m x 1m blanket is perfect for use in kitchens, caravans, boats, or RVs. The larger 1.2m x 1.8m blanket is designed for areas in the home where there's a risk of adult clothing catching fire, such as garages or workshops.

Features & Benefits

- Australian Standard certified to AS3504
- Tough protective PVC pouch with application and folding instructions
- Mounting holes on pouch for wall hooks
- Pull down tabs for ease of removal
- Suitable for smothering small cooking oil fires and clothing fires (1.2 x 1.8m only)
